Project Narrative

Existing Conditions:

Currently, a single-family house and its developed yard sit on the front half of the lot while Bordering Vegetated Wetlands occupy the back half.

Project Description:

As approximately half of the lot is Bordering Vegetated Wetlands, all proposed work occurs within the 100-foot Buffer Zone. The project includes two proposed additions to the existing house, one on the eastside and one on the westside. The work will also replace an existing gravel drive with a new drive in front of the house. Most of the construction will take place on previously developed land. Prior to construction, siltation fencing will be installed as erosion control to protect the Wetlands. The fencing will be removed after a Certificate of Compliance has been issued or the site has been stabilized with vegetation.

Resource Area Descriptions:

The resource area consists of Bordering Vegetated Wetlands, delineated by the Town of Acton Natural Resources Department.

Compliance with General Performance Standards for BVW 310 CMR 10.55(4)(a-e):

The proposed project complies with the General Performance Standards for a Bordering Vegetated Wetland since there is no, filling, dredging, or altering the BVW. The siltation controls will mitigate any potential indirect alteration of the wetlands during construction.

Compliance with Town of Acton Wetland Protection Regulations:

Section 3.3 Wetland Setbacks for Existing Structures

No new activity shall be commenced and no new structure shall be located closer to the edge of a Wetland Resource Area than existing non-conforming like Activity or structures...

The proposed additions will be structures like the existing house and will be constructed no closer to the wetlands than the house is currently (25'). The new drive will be approximately 65' from the Wetlands compared to the current drive at 50'.

To calculate filing fees, refer to the category fee list and examples in the instructions for filling out WPA Form 3 (Notice of Intent).

B. Fees**Notice of Intent (Form 3) or Abbreviated Notice of Intent (Form 4):**

The fee should be calculated using the following six-step process and worksheet. **Please see Instructions before filling out worksheet.**

Step 1/Type of Activity: Describe each type of activity that will occur in wetland resource area and buffer zone.

Step 2/Number of Activities: Identify the number of each type of activity.

Step 3/Individual Activity Fee: Identify each activity fee from the six project categories listed in the instructions.

Step 4/Subtotal Activity Fee: Multiply the number of activities (identified in Step 2) times the fee per category (identified in Step 3) to reach a subtotal fee amount. Note: If any of these activities are in a Riverfront Area in addition to another Resource Area or the Buffer Zone, the fee per activity should be multiplied by 1.5 and then added to the subtotal amount.

Step 5/Total Project Fee: Determine the total project fee by adding the subtotal amounts from Step 4.
